

READING YOUR ACCOUNT STATEMENT

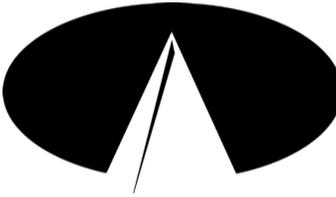

Following is a sample account statement which describes the information that is provided. Once Acumen processes an initial payment as the fiscal agent, the employer or authorized representative will begin receiving account statements. The account statement provides very important information that is essential in managing the individual's services. It is important that the reader understand this information.

The word "Activity" and the date range are shown at the top right of the account statement. The account statement **ONLY** reports checks issued during this date range. The balance does not reflect any submissions for payments that have not been processed. The activity period does not reflect service dates; it reflects check processing dates.

The statement is similar to the information provided on a bank statement when checks are written. A check may have been written on Monday, but may not have been deducted from the account before the bank statement is provided. The amount of the check must be deducted from the balance shown on the bank statement in order to reach the current balance. When the employer or authorized representative receives the account statement, as with the bank statement, they must deduct any services that have not been paid in order to determine the current balance.

Remember that one of the benefits of using Web Time Entry is that you can access your account information 24 hours a day, 7 days a week.

If you have any questions after reviewing the account statement sample or after receiving your account statement, please contact Acumen for assistance. Our Customer Service Representatives will be glad to assist you.
